**No. 16 Boiler.** Dave Peterson and Rob Brazeau picked up the new boiler at Lund Manufacturing, New Ulm, Minnesota, Saturday, October 28th. The boiler was mounted on the frame, A new smoke box was provided in the project. Providing a new smoke box was easier than reusing the existing one.

The throttle and it's piping are complete and the original reflex water sight glass has been installed.

The steam dome is taller than the existing to accommodate the interior piping for the throttle location.

**No. 16 Boiler.** Rob Brazeau completes the tie down of No. on the trailer for the return to Eau Claire.

Rob's son Ben provided the trailer for move.

With the help of Ben, Rob and Dave moved the locomotive into the shop for Saturday evening.

The next step is cleaning the existing parts and acquiring new piping to compete the project.
